DEFINING CHARACTERISTICS

Planetary Drive Winch System

The winch is equipped with a 1.8 HP permanent magnet electric motor with a 261:1 planetary gear reduction system. This ensures that your winch will never quit lifting before it reaches the full rated capacity.

Double Boom Design

The double boom design makes it nearly twice as strong as the nearest competitor.

Gear Bearing Rotation

Uses same rotation system as the larger class cranes. There are no plastic bushings or brass gears in the rotation system. It uses a high strength steel ball bearing turntable gear, a high strength steel worm gear, and a cast steel worm gear housing.

Integral Rotation Stop

410 degrees of rotation with an integrated rotation stop. Integrated stops allow you the greatest performance while protecting wires and hoses from damage.

15' of Reach

Hydraulic 1st stage extension. Manual 2nd stage extension.

Radio Remote

Comes standard with a radio remote control.

NOTE: All Stellar cranes meet ANSI B30.5 and OSHA 1910.180 specifications. Specifications subject to change without notification.
